Product Specific Information	General Information
<p>Anti-Phospho-Smad3 (Ser423/425) Monoclonal Antibody MA5-11193 reacts with human, mouse and rat samples, and has been tested and validated in use for Western Blot, Immunoprecipitation, and ChIP application. Predicted to react with non-human primate, xenopus, zebrafish and bovine based on sequence homology.</p> <p>A molecular weight of approximately 52 kDa is expected.</p>	<p>The protein encoded by this gene belongs to the SMAD, a family of proteins similar to the gene products of the Drosophila gene 'mothers against decapentaplegic' (Mad) and the C. elegans gene Sma. SMAD proteins are signal transducers and transcriptional modulators that mediate multiple signaling pathways. This protein functions as a transcriptional modulator activated by transforming growth factor-beta and is thought to play a role in the regulation of carcinogenesis.</p>
