Product Specific Information	General Information
PA1-27809 detects ADFP from human, mouse, rat samples.	Adipocyte differentiation-related protein is associated with the globule surface membrane material. This protein is a major constituent of the globule surface. Increase in mRNA levels is one of the earliest indications of adipocyte differentiation.
PA1-27809 may be successfully used in Western blot applications. By Western blot, this antibody has only been tested on fusion protein.	
The PA1-27633 immunogen is a synthetic peptide corresponding to human Adipose differentiation-related protein.	

This product is for In Vitro experimental use only. Not for resale without express authorization.
